

MANGESH LOMTE

Software Developer | Full-Stack (Java / .NET / React)

Pune, India | mangesh.lomte.2002@gmail.com | +91 9737930634 | github.com/mangesh-lomte

PROFILE

Software Developer with a B.Tech in Information Technology and Post Graduate Certificate Program in Advanced Computing (PGCP-AC) training from C-DAC, with hands-on experience building full-stack applications using React, ASP.NET Core, Java, REST APIs, SQL, JWT authentication, Docker, and AWS. Built and deployed a multi-module restaurant management system with QR-based ordering, role-based workflows, independent backend services, and cloud deployment. Strong foundation in OOP, problem solving, and software development fundamentals.

TECHNICAL SKILLS

Languages	Java, C++, C#, JavaScript
Frontend	React.js, HTML5, CSS3, Tailwind CSS
Backend	ASP.NET Core Web API, Java Spring Boot, REST APIs
Database	SQL Server, MySQL, DBMS, Entity Framework Core
Security	JWT Authentication, Role-Based Authorization
DevOps & Tools	Docker, AWS EC2, Git, GitHub, Visual Studio, VS Code, Postman
Concepts	OOP, Layered Architecture, Dependency Injection, Microservice/Service-Oriented Architecture

PROJECTS

Smart AI & QR-Based Restaurant Management System | C-DAC PGCP-AC Project

- Built a QR-enabled restaurant management platform supporting customer, administrator, and restaurant-staff workflows for digital menus, ordering, inventory, staff, and offer management.
- Developed REST APIs using ASP.NET Core Web API and C#, following layered architecture with Dependency Injection and Entity Framework Core.
- Implemented JWT-based authentication and role-based authorization to secure protected APIs and manage user access.
- Developed an independent Java Spring Boot Notification Service integrated with Gmail SMTP for automated email notifications.
- Containerized the application using Docker and deployed the system on AWS EC2 for cloud-based access.
- Integrated React.js and Tailwind CSS frontend with backend REST APIs for responsive restaurant operations.

Stack: React.js, Tailwind CSS, ASP.NET Core Web API, C#, Java, Spring Boot, Entity Framework Core, SQL Server, JWT, Docker, AWS EC2, QR

Road Safety Alert System | College IoT Project

- Designed an IoT-based pedestrian safety prototype using Arduino UNO R3, LEDs, and three servo motors to control vehicle barriers and pedestrian crossing movement.
- Implemented automated traffic-signal logic where servo-controlled barriers restrict vehicle movement during red signals while a dedicated servo manages pedestrian crossing access.
- Programmed and tested the hardware control logic using C++ with Arduino IDE and validated the prototype through hands-on circuit testing.

Stack: C++, Arduino UNO R3, Arduino IDE, Servo Motors, LEDs, IoT Hardware

WORK EXPERIENCE

Web Developer Intern | Txon, Pune | 6 Months

- Built and maintained responsive web pages using HTML, CSS, and JavaScript with a focus on clean navigation and user experience.
- Debugged and tested web applications to identify and resolve functional issues before release.
- Worked with the development team on day-to-day feature implementation and maintenance tasks.

EDUCATION

Centre for Development of Advanced Computing (C-DAC), Pune Post Graduate Certificate Program in Advanced Computing (PGCP-AC)	2026
Genba Sopanrao Moze College of Engineering B.Tech, Information Technology CGPA: 8.3	2020-2024
Shri L.G. Haria Multipurpose School Senior Secondary (CBSE, Class 12) 70.2%	2019-2020
Shri L.G. Haria Multipurpose School Secondary School (CBSE, Class 10) 73%	2017-2018
